

PEOPLE / PRODUCT / PLANET™

Summer 2009

35th Company anniversary

2009 sees Marmot celebrate its birthday.

For 35 years, Marmot has developed top quality functional clothing and equipment for mountaineers, outdoor enthusiasts and extreme alpinists.

For years, top athletes like Stefan Glowacz have depended on the quality and performance of Marmot products. Today more than ever, Marmot is focused on sustainability and the environment.

In 1975, just one year after the company was founded, Hollywood called on them to produce down jackets for a Clint Eastwood film.

The following year, 1976, saw their first collaboration with Gore, making Marmot the longest standing outdoor trade partner of the legendary membrane manufacturer.

What's new for Summer '09

The biggest Marmot news for Spring 2009: On the 10th anniversary of the launch of the legendary Precip Jacket, Marmot has once again innovated the rainwear category with the launch of its new MemBrain® Strata™.

For ten years, Precip's original silk protein based coatings have provided best-in-class performance. Now, Marmot presents 15 new styles in MemBrain® Strata™: a lamination that provides higher breathability, higher waterproofness, lighter weight, a drier touch and greater comfort as standard.

Garments made from MemBrain® Strata™ are the lightest most breathable in their category. The exclusive .5-Layer print on the inside protects the laminate and is much lighter than a 3-layer or lined construction.

The new technology is included in highly featured mountain jackets and a new ultralight product range: Full waterproof breathable performance from some styles in the line that weigh significantly less than 200 g and can be packed to nearly nothing.

Further Product news:

An almost completely new softshell M3 range of jackets and pants in super air permeable fabrics that also give reliable weather and wind protection.

Marmot constantly works to fulfil our company's goal and standards of sustainability. Performance and Eco Casual Sportswear include 60 new styles with eco-friendly materials such as organic cotton, bamboo and hemp. The performance line in addition to focusing on lightweight, compactness and breathability, also offers materials with a cotton-like-hand, that dry fast and provide a high level of UV protection. This includes the use of many Up-cycled fabrics.

In equipment, lots has happened: The entire backpack line has been updated or renewed. New features and details provide even more comfort, fit and versatility.

FOLLOW THE GREEN CAR!

Last November the Marmot athletes Gerhard Hörhager, Markus Bock and the photographer Klaus Kranebitter visited Dani Andrada with his girlfriend Andrea and Chris Sharma. Chris is currently living in Spain, with his girlfriend Daila in order to check out the latest hot spots in Spain.

FOLLOW THE GREEN CAR!

And as it is of course much easier to get your bearings with friends who know one another, for 10 days we adopted the motto "Follow the green car!", which was a reference to the colour of Andrea's car.

Spain boasts a seemingly endless array of rocky potential, with all sorts of different rocks. These include granite, limestone, conglomerate, sandstone, ...

And these different types of rock are often not very far apart.

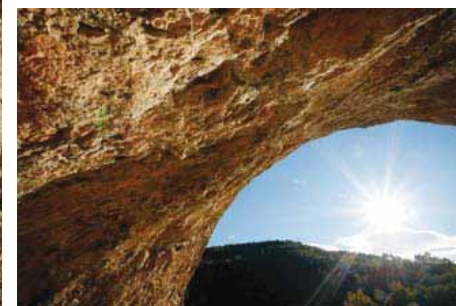

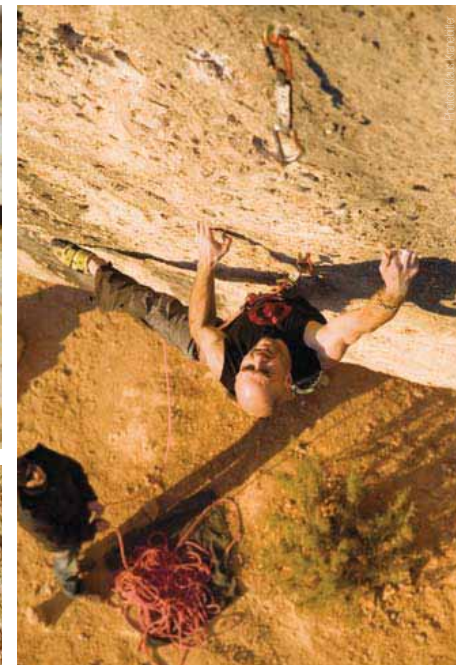

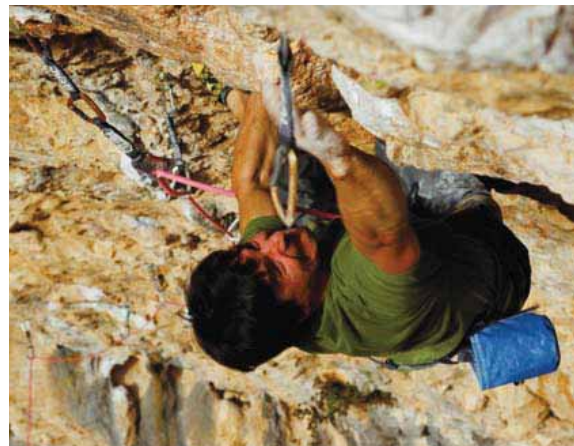

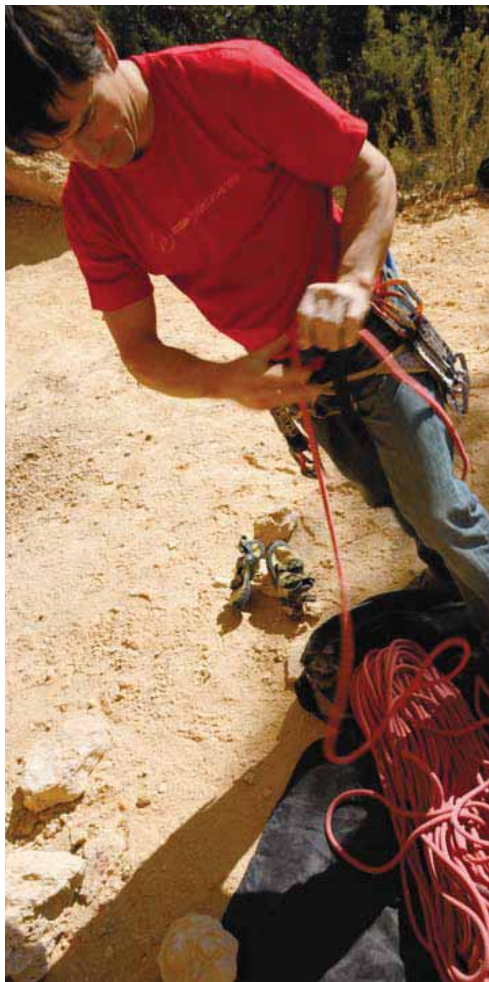

Expeditions are usually long compared to many other regions and you therefore need a good level of stamina, which was initially a real issue for our boys.

But they were not put off; after all they do have many years of experience and they are well aware that you need to adjust to new conditions every time you travel to new territory.

And after a number of days of climbing, there were then plenty of successes. For example, they climbed routes from the lower 10 degrees to the lower 11 degrees, exceptionally safely "Los últimos vampiros hippies" 8c which Markus Bock was able to repeat.

But Spain was not just worth visiting for its rocks. We were also tempted to make the trip by the opportunity to escape the miserable November weather and enjoy all the culinary delights of the country.

AND: We are sure to return!

Shells

Innovative Technology

Besides the classic PreCip™, the shell category includes **two large segments: Ultralight products** on one side, offering gear that has been reduced to the minimum weight while still offering the necessary performance and features; and on the other, **highly equipped jackets** that fight every weather condition.

Marmot Products

Marmot outerwear is developed to meet the variety of **needs of the hard-core alpinist, the value-oriented enthusiast, and the ultra-light explorer**. If it is not on a Marmot jacket, you can probably do without it.

Anatomy of Marmot Outerwear

At Marmot, we design our outerwear from the inside out. We do everything possible to make sure you stay warm, dry and comfortable. The jacket below demonstrates our belief at Marmot - that outerwear is Equipment.

The Exum Jacket

National Geographic Adventure Magazine's Best of Adventure Gear Award

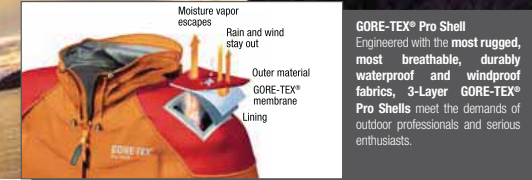

The Troll Wall Jacket

Inside view

GORE-TEX® Pro Shells

GORE-TEX® Pro Shell
Engineered with the most rugged, most breathable, durably waterproof and windproof fabrics, 3-Layer GORE-TEX® Pro Shells meet the demands of outdoor professionals and serious enthusiasts.

TROLL WALL JACKET
Sizes S, M, L, XL, XXL
Materials GORE-TEX® Pro 3L
(100% Nylon)
CB Length 76 cm
Weight (Size M) 567 g

Rugged, lightweight GORE-TEX® protection that's worthy of its legendary namesake in Norway. This professional shell's three-layer, weatherproof construction features our Micro Grid woven backer technology for improved internal abrasion and snag resistance, breathability, and decreased weight.

Features: Angel-Wing Movement™ • Designed to Fit Over Fleece or Softshells • DriClima® Lined Chin Guard • Elastic Draw Cord Hem • ERG Hood Adjustment System • Gale-force Hood with Laminated Wire Brim • GORE-TEX® PRO Shell • Helmet Compatible • Integrated Laser-Drilled Pocket Backing for Enhanced Breathability • Internal Zip Mesh Storage Pocket • Laser Drilled Pack Pockets™ with Water-Resistant Zippers • Micro-Stitched and 100% Seam Taped • PitZips™ with W/R Zippers • Sleeve Pocket with Water-Resistant Zippers • Zip-off Powder Skirt

EXUM JACKET
Sizes S, M, L, XL
Materials GORE-TEX® Pro 3L
(100% Nylon)
CB Length 72 cm
Weight (Size M) 425 g

Refined with input from internationally experienced guides, the award-winning Exum is a full-function, light-weight GORE-TEX® shell for demanding alpine conditions.

Features: Angel-Wing Movement™ • Designed to Fit Over Fleece or Softshells • DriClima® Lined Chin Guard • Elastic Draw Cord Hem • ERG Hood Adjustment System • Gale-force Hood with Laminated Wire Brim • GORE-TEX® PRO Shell • Integrated Laser-Drilled Pocket Backing for Enhanced Breathability • Internal Mesh Storage Pocket • Micro-stitched and 100% Seam Taped 3-Layer Construction • Pack Pockets™ with Water-resistant Zippers • PitZips™ with W/R Zippers • Reinforced Shoulders and Elbows

EXUM PANT
Sizes S, M, L, XL
Materials GORE-TEX® Pro 3L
(100% Nylon)
Weight (Size M) 652 g

The Exum Pant is a full-protection GORE-TEX® pant, lightweight thanks to a spartan design, but built to offer the highest level of protection for all types of alpine activities.

Features: 100% Seam-taped 3-layer Construction • Adjustable Suspenders with Drop Seat • Articulated Knees • Designed to Fit Over Fleece or Softshells • Full Side Zippers with Bonded Storm Flaps • GORE-TEX® PRO Shell • Internal Stretch Gaiter with Boot Loops • Reinforced Seat, Knees and Ankles • Stretch Waistband Insert • Zip Fly

WOMEN'S FJELL JACKET
Sizes XS, S, M, L, XL
Materials GORE-TEX® Pro 3L
(100% Nylon)
CB Length 68 cm
Weight (Size M) 510 g

Calling this shell the top of the line is just the tip of the iceberg. Made to fit over fleece or softshell layers, this three-layer GORE-TEX® Pro Shell can take you to the wildest landscapes on Earth, and do it in style. Cut and sized specifically for the female form, the Fjell is mountain tough and brimming with technical appointments.

Features: Angel-Wing Movement™ • Designed to Fit Over Fleece or Softshells • DriClima® Lined Chin Guard • Elastic Draw Cord Hem • ERG Hood Adjustment System • Gale-force Hood with Laminated Wire Brim • GORE-TEX® PRO Shell • Helmet Compatible • Integrated Laser-Drilled Pocket Backing for Enhanced Breathability • Internal Zip Mesh Storage Pocket • Laser Drilled Pack Pockets™ with Water-Resistant Zippers • Micro-Stitched and 100% Seam Taped • PitZips™ with W/R Zippers • Sized Specifically for Women • Wrist Pocket with Water-Resistant Zippers • Zip-off Powder Skirt

WOMEN'S EXUM JACKET
Sizes XS, S, M, L, XL
Materials GORE-TEX® Pro 3L
(100% Nylon)
CB Length 68,5 cm
Weight (Size M) 380 g

Refined with input from internationally experienced guides, the Exum is a full-function, lightweight GORE-TEX® shell for alpine climbs, spring ski-mountaineering and long journeys in wet climates.

Features: Angel-Wing Movement™ • Designed to Fit Over Fleece or Softshells • DriClima® Lined Chin Guard • Elastic Draw Cord Hem • ERG Hood Adjustment System • Gale-force Hood with Laminated Wire Brim • GORE-TEX® PRO Shell • Internal Mesh Storage Pocket • Micro-stitched and 100% Seam Taped 3-Layer Construction • Pack Pockets™ with Water-resistant Zippers • PitZips™ with W/R Zippers • Reinforced Shoulders and Elbows • Sized Specifically for Women

WOMEN'S EXUM PANT
Sizes XS, S, M, L, XL
Materials GORE-TEX® Pro 3L
(100% Nylon)
Weight (Size M) 624 g

A professional's ideal GORE-TEX® pant: built for the most demanding conditions with a weight-conscious design and an essential WizZip demanded by serious alpinists and casual adventurers alike.

Features: Adjustable Suspenders with Drop Seat • Articulated Knees • Designed to Fit Over Fleece or Softshells • Full Side Zippers with Bonded Storm Flaps • GORE-TEX® PRO Shell • Internal Stretch Gaiter with Boot Loops • Micro-stitched and 100% Seam Taped 3-Layer Construction • Reinforced Seat, Knees and Ankles • Stretch Waistband Insert • WizZip with inside wind flap

GORE-TEX® Performance Shells

GORE-TEX® Performance Shell
Designed to provide **breathable comfort** and **durably waterproof and windproof protection**, GORE-TEX® Performance Shells are ideal for a wide range of outdoor activities.

Photo: Jura Lare

SPIRE JACKET
Sizes S, M, L, XL
Materials GORE-TEX® Performance 3L
(100% Polyester)
CB Length 74 cm
Weight (Size M) 708 g

We didn't skimp on anything when designing our most affordable offering in a three-layer GORE-TEX® Performance Shell. With exclusive features like the laminated wire rim of our Gale Force hood, and laser drilled pocket backing for enhanced breathability, the Spire jacket is the perfect go-to shell for intense outings.

Features: GORE-TEX® Performance Shell • ERG hood adjustment system • Integrated laser drilled pocket backing for enhanced breathability • Designed to fit over fleece or softshells • Micro-stitched and 100% seam taped • Helmet compatible Gale Force hood laminated wire brim • PizZips™ • Pack Pockets™ with water resistant zippers • Zip-out powder skirt • Internal zip mesh storage pocket • Elastic draw cord hem • DriClima® lined chin guard • Angel-Wing Movement™

Colours

WOMEN'S SPIRE JACKET
Sizes XS, S, M, L, XL
Materials GORE-TEX® Performance 3L

MEMBRAIN® strata™

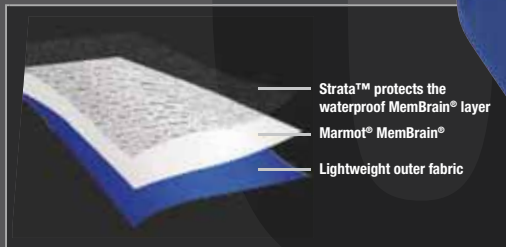

5-Layer protects the lamination and does not require a lining or 3-Layer construction

Marmot's own **lightweight waterproof/ breathable technology**. A lamination technology that rates a whopping **20,000 mm in waterproof performance and 20,000 g/m²/24h in breathability**. Requiring neither lining nor 3-layer construction like many similar lamination processes, MemBrain® Strata™ products are by far the lightest, most breathable garments in their categories.

Marmot's proprietary **2.5 layer lamination** uses very small **non-organic particles mixed with Marmot MemBrain®** that protects the membrane from direct abrasion and creates a very dry touch.

The back print pattern is carefully designed to achieve the maximum durability and breathability. Abrasion tests rate 4-5 times better than regular MemBrain® (which is why regular MemBrain, as well as all 2-layer laminates require a separate lining).

Compared to 2.5 layer coatings in the market, our 2.5 layer lamination is about 100% more breathable. In addition, laminated stretch fabrics stretch more and have a softer hand than 2.5 layer coated fabrics.

MEMBRAIN® strata™

AEGIS JACKET

Sizes S, M, L, XL, XXL

Materials Concord 2.5 Lamination
(100% Nylon)

CB Length 74 cm

Weight (Size M) 398 g

We've combined superior weather beating performance with a wealth of creature comforts to create the Aegis jacket. MemBrain® Strata™ fabric sheds water and breathes easily to keep you dry. Hand warmer pockets featuring water resistant zippers, DriMClime® lined collar and cuffs, PitZips™, and an adjustable hood that rolls into the collar, all add up to an essential backcountry companion.

Features: 100% Seam Taped • Angel-Wing Movement™ • Attached Adjustable Hood that Rolls Into Collar • DriClime® Lined Collar and Chin Guard • Asymmetric Cuffs with Velcro® • Elastic Draw Cord Hem • Hand Warmer Pockets with Water Resistant Zippers • Marmot MemBrain® 2.5 Waterproof / Breathable Fabric • PitZips™ • Sleeve Pocket with Water-Resistant Zippers

Colours

MICA JACKET

Sizes S, M, L, XL

Materials Clarion 2.5 Lamination

PreCip®

PreCip® is our "next step" technology that enables us to construct the lightest, most compressible, technical, waterproof and breathable rainwear in the world. Ventilated and breathable to keep you dry from the inside, PreCip® rainwear has plenty of pockets and custom fit features to keep you warm, dry and comfortable.

The key to PreCip® is its barrier technology: a microporous polyurethane that is impregnated with silicon dioxide particles. These particles create small, numerous, very consistent holes that allow the barrier to pass small water vapor molecules but not the bigger liquid ones. This keeps the rain out while letting your sweat vapor work its way outside, away from your body, to keep you dry from the inside as well as from the outside. PreCip® rainwear is compressible enough to stuff into a water bottle and comes in enough colors and styles to travel with you anywhere – to the mountains, the city or overseas.

PRECIP® JACKET

Kayaking through Kyrgyzstan

“Wherever there are high mountains there is bound to be white water,” thought the eight intrepid canoeists who later set off for faraway Kyrgyzstan, where they hoped to explore new rivers in their kayaks.

It took a great deal of effort to find what little information about the country's rivers is actually available. This meant that they had to rely on what they were told by the locals as well as their own intuition most of the time.

The team first got the feel of things by paddling their way along two smaller rivers. They then headed to the north of Lake Issyk Kul in a “Ural” military truck which was about 30 years old.

The friends spent three days paddling through category-five white water with rapids and eroded rocks. After spending between five and eight hours in the water each day, they would put their tents up in the evening and then crawl into their sleeping bags exhausted.

They then continued on to the River Naryn. On this occasion, they set off from a height of 3,500 metres amid heavy driving snow.

From there, they paddled through stunning landscapes with a remarkable sparse beauty. They encountered a variety of terrain – sometimes gentle, at other times extremely difficult.

They then headed back to civilisation in the “Ural”. After seeing and experiencing so many impressive things, those who took part in the expedition are already on the lookout for new and undiscovered destinations...

Active Outerwear

When waterproof is too much. Marmot offers a complete collection of versatile active outerwear designed to protect you from the elements while allowing your body to breathe naturally.

Award Winning Jackets

Winning the 2008 Backpacker Magazine Editor's Choice Green Award for the Catalyst Jacket gives Marmot the distinction of being the first company to earn Backpacker's "Triple Crown", honoring the garment three separate times.

As the next step in Marmot's DriClima® evolution, the Catalyst uses Upcycle® fabric in the bi-component lining (100%), a recycled polyester face fabric (88%) and a completely recycled zipper.

Softshell Outerwear

Versatility - A Softshell for Every Condition

Stretchable, water repellent, abrasion resistant, highly breathable shell materials with insulating buffer materials on the inside. Garments made with these fabrics can keep you **drier** and more comfortable than traditional layering systems of heavy shell jackets and insulation layers in all but the **most extended rainy** conditions.

Combined with Baselayers and Midlayers you can stay warm, dry and comfortable in virtually any condition. Since none of the layers will absorb moisture, your body heat will continually push moisture vapor from the system, and you won't have to adjust layers as often. Just add a lightweight waterproof shell to your pack and you're ready for anything.

Our collection of garments conceived and designed based on the wide range of weather conditions and end use requirements. These garments span the performance "continuum" from mild weather, high aerobic conditions to cold, wet and less active conditions.

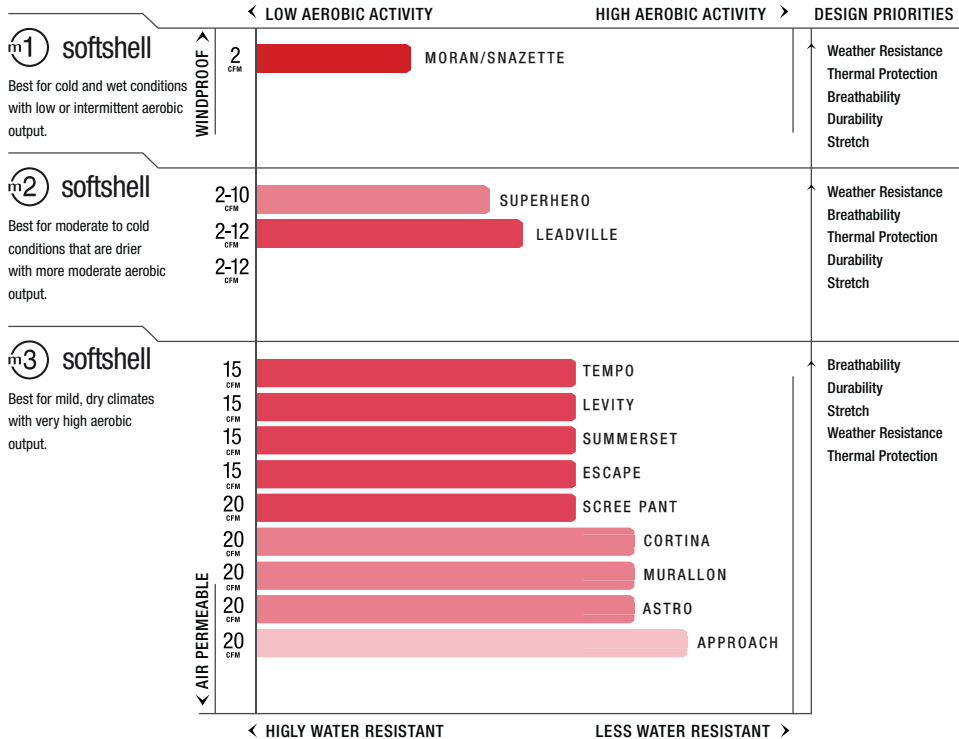

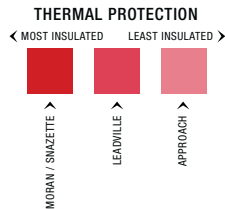

Softshell's Range of Uses

Total versatility for all environments.

Marmot softshells are a series of blended shell garments designed for a range of functions, weather conditions and end-uses.

This range is organized into three distinct performance groups:

M1, M2 and M3. Each performance group is designed for a specific range of use.

Men's Sportswear Performance

ESTES SHORT / PANT
 Sizes 30, 32, 34, 36, 38
 Materials 94% Nylon 6% Elastane
 Inseam 10"

From the mind of Marmot and climbing legend Tommy Caldwell comes the Estes Short. Stretchable, quick-drying, and just begging to be abused, this is a perfect match for our Kaos half zip tops and an essential part of your all-purpose adventure kit. See how clothing designed by athletes, for athletes, can elevate your next climbing experience.

CRUZ SHORT / PANT / CONVERTIBLE PANT
 Sizes 30, 32, 34, 36, 38
 Materials 100% Nylon
 Inseam 10" (Short and Convertible Pant)

Quick-drying nylon, enhanced with UPF protection, makes for one tough and ready pair of shorts. Perfect for adventure vacations, they're styled for everyday comfort and practicality. The versatile pants keep you dry and comfortable and look great even under stress. Soft, lightweight, and pliable, they're tailor made for life on the road. Pack your essentials in the secure side cargo pockets.

Men's Eco Casual

NILE SHORT SLEEVE
 Sizes S, M, L, XL, XXL
 Materials 100% Certified Organic Cotton

An intricate Dobby weave lends a distinctive style to this organic cotton shirt. Made using Upcycled® materials, it's garment washed for comfort, with natural Corozo nut buttons.

KENYA SHORT SLEEVE
 Sizes S, M, L, XL, XXL
 Materials 100% Certified Organic Cotton

The design is modern and casual, while the vertically striped pattern recalls classic African textiles. Part of Marmot's earth-friendly Upcycle® program. Choose from three distinctive colors.

GANGES SHORT SLEEVE
 Sizes S, M, L, XL, XXL
 Materials 100% Certified Organic Cotton

100% certified organic cotton makes this elegant shirt soft and pliable. Garment washed for instant gratification, and made using Upcycled® materials.

GOA SHORT
 Sizes 30, 32, 34, 36, 38
 Materials 100% Certified Organic Cotton
 Inseam 10"

Durable and relaxed, this organic cotton short is garment washed for softness and pliability. The slightly higher inseam lessens irritation while hiking or running.

PLAYA SHORT
 Sizes 30, 32, 34, 36, 38
 Materials 100% Certified Organic Cotton
 Inseam 11"

Your new favorite shorts have detailed embroidery on the inside, and secure side cargo pockets on the outside. A gusseted crotch minimizes wear and tear.

Men's Eco Casual

WOMEN'S ANNADALE PANT
 Sizes 2, 4, 6, 8, 10, 12
 Materials 100% Nylon

Superb bottoms for light and agile touring, adjustable roll-up legs and secure side cargo pockets lend them versatility, and RapiDry nylon deftly curbs moisture. Choose from four understated colors.

WOMEN'S MOJAVE SPORT TANK
 Sizes XS, S, M, L, XL
 Materials 92% Supplex Nylon 8% Elastane

Comfortable, quick-drying stretch-nylon and a hidden stash pocket make the versatile Mojave Tank a clear favorite for long, active outings and multi-sport athletes.

WOMEN'S SHASTA SHORT SLEEVE
 Sizes XS, S, M, L, XL
 Materials 100% Polyester (50% Upcycle® Polyester)

With a quick-drying nylon and odor fighting Cocona® polyester blend, the form-fitting Shasta excels as both a base layer and outer layer for long days spanning a range of temperatures.

WOMEN'S ANU SPORT TANK
 Sizes XS, S, M, L, XL
 Materials 92% Supplex Nylon 8% Elastane

A built-in sports bra and awesome stretch make this cool little tank perfect for the gym or as a warm-weather baselayer. Colors are vibrant and versatile, and flat lock construction means no irritating seams.

WOMEN'S TOPAZ SKORT
 Sizes XS, S, M, L, XL
 Materials 100% Nylon

The breezy comfort and style of a short skirt meets the practicality of a form-hugging short. The ultra-soft RapiDry nylon is sheer comfort: Cut, sized, and styled to go with practically anything.

WOMEN'S SIERRA SHORT SLEEVE
 Sizes XS, S, M, L, XL
 Materials 100% Nylon

With slimming vertical stripes and a form-fitting cut, this nylon short sleeve is at home on the range, and at backyard barbecues too! RapiDry nylon is UPF protected to shield you from harmful UV rays, yet has the soft hand of cotton.

Women's Sportswear Performance

WOMEN'S CASCADE SHORT SLEEVE
 Sizes XS, S, M, L, XL
 Materials 100% Polyester (50% Upcycle® Polyester)

Quick-drying, comfortable and breathable: the Cascade is ideal for high intensity summer activities. Made with fabric from recycled materials.

WOMEN'S CASCADE SLEEVELESS
 Sizes XS, S, M, L, XL
 Materials 100% Polyester (50% Upcycle® Polyester)

An ecologically sound Marmot Upcycle® product, this sleeveless top is available in six eye-catching colors. UPF 50 protection, wicking moisture management, and an incredibly soft hand make this a great choice for intense workouts or runs.

WOMEN'S CONFESSION CAPRI
 Sizes XS, S, M, L, XL
 Materials 86% Polyester (Upcycle® Polyester) 14% Elastane
 Inseam 19"

The lightweight, silky feel of the Confession's stretchy fabric combined with a practical design makes it a popular capri pant for all-around summer use, both indoors and outdoors.

WOMEN'S BLISS SHORT
 Sizes XS, S, M, L, XL
 Materials 92% Supplex Nylon 8% Elastane
 Inseam 4 1/2"

The breathable, comfortable stretch fabric and form-hugging fit of the Bliss make it perfect for summertime aerobic outings and gym workouts.

WOMEN'S BLISS SKORT
 Sizes XS, S, M, L, XL
 Materials 92% Supplex Nylon 8% Elastane
 Inseam 4"

For hiking, trips to the beach and post-boating bon-fires, the stretchy, quick-drying Bliss Skort delivers comfort and style.

WOMEN'S BLISS CAPRI
 Sizes XS, S, M, L, XL
 Materials 92% Supplex Nylon 8% Elastane
 Inseam 19"

Dynamic and comfortable Supplex nylon, a flattering fit and an eye-catching graphic give the Bliss Capri both form and function for cragging, hiking, yoga and gym climbing.

WOMEN'S MOONSTRUCK TANK
 Sizes XS, S, M, L, XL
 Materials 92% Supplex Nylon 8% Elastane

Aesthetics blend seamlessly with function in the beautifully designed, Supplex nylon Moonstruck Sport Tank.

WOMEN'S VOGUE TANK
 Sizes XS, S, M, L, XL
 Materials 92% Supplex Nylon 8% Elastane

With soft and stretchy Supplex nylon and a design that's as eye-catching as it is functional, the Vogue Tank is a favorite for everything from yoga to climbing to jogging.

WOMEN'S LOST RIVER LONG SLEEVE HALF ZIP
 Sizes XS, S, M, L, XL
 Materials 92% Supplex Nylon 8% Elastane

Fast-drying, stretchy nylon and a practical half-zip make the Lost River Long Sleeve an ideal top for long days out under a wide range of temperatures.

Women's Eco Casual

certified organic

WOMEN'S GURU SHORT

Sizes 2, 4, 6, 8, 10, 12

Materials 70% Organic Cotton 21% Polyester (Upcycle® Polyester) 9% Hemp
Inseam 6"

Get in touch with your inner tomb raider with this cargo style short, made from ultra-comfy organic cotton, Upcycled® polyester, and hemp. Secure side cargo pockets are perfect for adventure travel.

Colours

WOMEN'S SOLAR SHORT SLEEVE HENLEY

Sizes XS, S, M, L, XL

Materials 51% Bamboo Rayon 49% Polyester (Upcycle® Polyester)

A southeast Asian inspired burnout pattern is applied to Upcycled® bamboo/poly fabric for this winning and flexible top. Incredibly soft, with a cute button front.

Colours

certified organic

WOMEN'S WW CAPRI

Sizes 2, 4, 6, 8, 10, 12

Materials 76% Organic Cotton 24% Hemp
Inseam 20"

With its ultra-soft hand and 65% organic cotton, the WW Capri continues to be a hugely popular, cleanly designed, multi-activity capri.

Colours

certified organic

WOMEN'S BAJA TANK

Sizes XS, S, M, L, XL

Materials 70% Bamboo Rayon 30% Organic Cotton

Bamboo fibers are silky smooth to the touch and highly absorbent. Here, they're combined with certified organic cotton to create an adorable, everyday top with an earth-first ethic. A delicate screen print offsets six restrained color options.

Colours

certified organic

WOMEN'S BUENA SHORT SLEEVE

Sizes XS, S, M, L, XL

Materials 55% Hemp 37% Polyester (Upcycle® Polyester) 8% Organic Cotton

With a unique fabric made from hemp, Upcycle® polyester and organic cotton, the Buena Short Sleeve is an eco friendly hot-weather shirt with a soft hand and stylish design.

Colours

certified organic

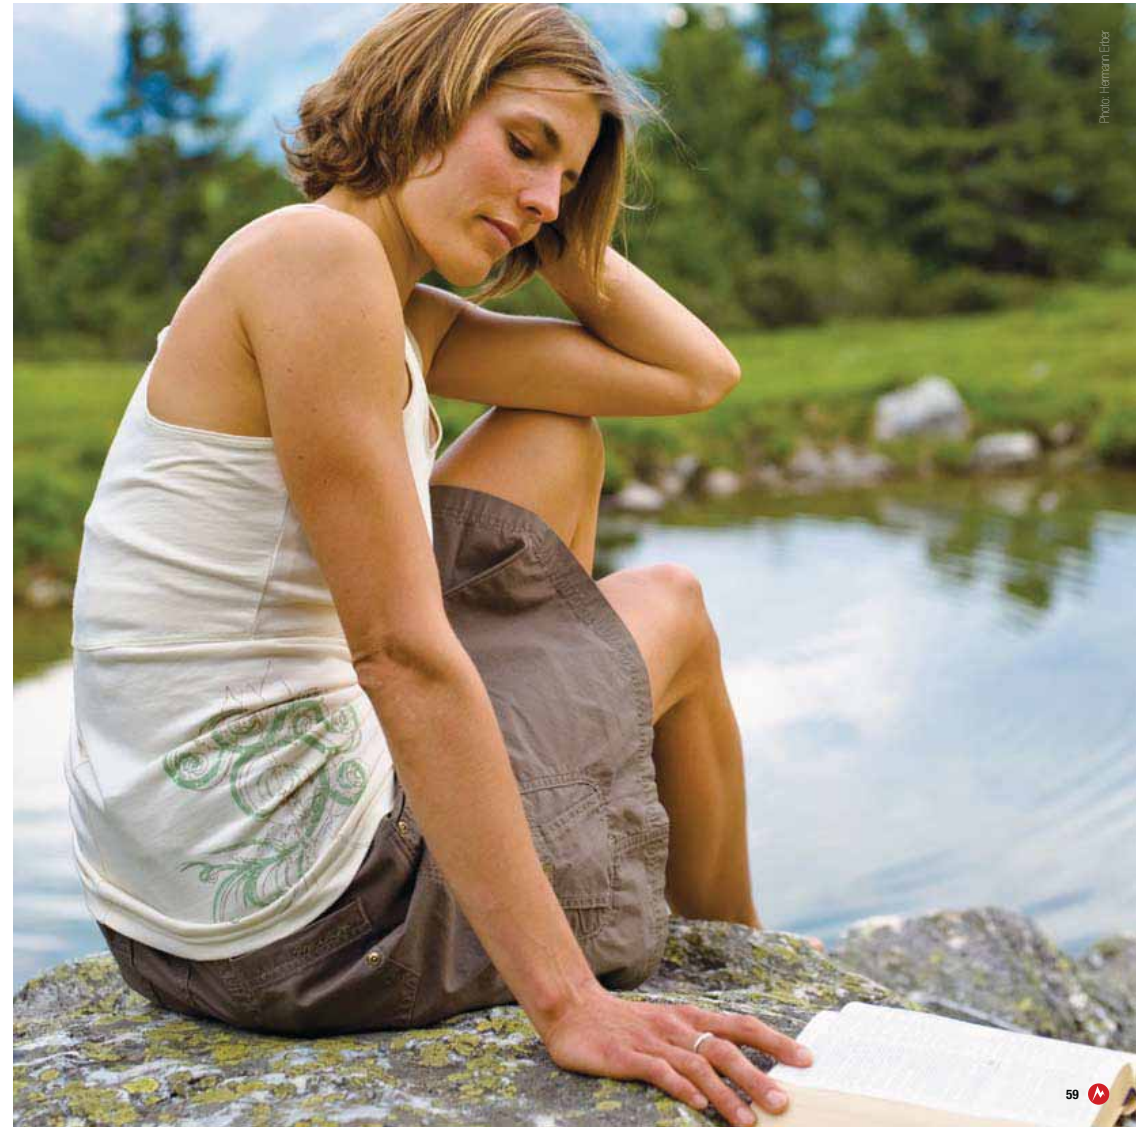

WOMEN'S ECO CREW VINE

Sizes XS, S, M, L, XL

Materials 100% Certified Organic Cotton

Delicate vines climb ever upward on this Upcycled® crew shirt, perfect for layering and so soft you'll never want to take it off. 100% certified organic cotton in six cheery colors.

Colours

Baselayer

As part of Marmot's Upcycle® efforts to utilize more eco-friendly materials, we partnered with **Polartec®** and **Cocona®** to develop the most technically advanced baselayer that works through natural means instead of chemical treatments.

- > Dries incredibly fast
- > Controls odor naturally - doesn't wash out!
- > Resists UV rays - rated UPF 40+
- > Exceptionally comfortable
- > Machine washable

POLARTEC® POWER DRY® TECHNOLOGY
Bi-component knit construction - smaller denier spun yarns with higher capillary action on the outside to 3-dimensionally "wick" the moisture away from the body and spread it out on the surface of the fabric for quick drying.

COCONA® PERFORMANCE TECHNOLOGY
Cocona® is an activated carbon polyester yarn made from coconut shells, a waste product of the coconut industry that would otherwise have ended up in landfill. The activated carbon yarn pulls moisture away from the skin to speed drying time, control odor, and provide UV protection. Cocona® does not contain chemical anti-microbials that can wash out.

LIGHTWEIGHT CREW SS

Sizes S, M, L, XL, XXL
Materials Polartec® Power Dry® with Cocona® performance technology (100% Polyester)

LIGHTWEIGHT CREW LS

Sizes S, M, L, XL, XXL

Packs

Marmot has reshaped, retested and overhauled our pack program. With the design goals of comfort and durability we have created ten new Mountain Collection packs, five Ultralight and eleven Urban styles.

MOUNTAIN COLLECTION: Designed for multi-use activities, Marmot's Mountain collection offers light weight, durability and comfort for multi-day outings or done-in-a-day activities. Features Air Comfort Technology and WrapSure™ Fit System.

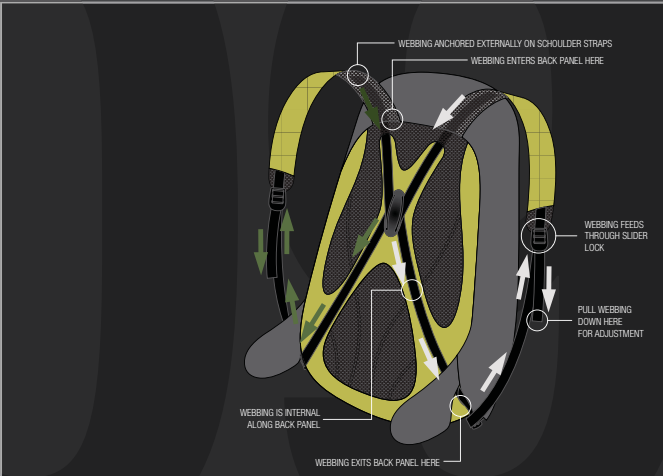

ULTRALIGHT COLLECTION: Designed for speed, but with the perfect balance of comfort and durability for extended outings. The Ultralight series stays fixed to your body no matter what activity you're doing. Features the WrapSure™ Fit System, waist belt pockets and rain flaps.

CARRYABLES COLLECTION: An active outdoor design philosophy. Using Upcycled® face fabrics and body matching pattern work, we are able to create comfortable, environmentally friendly shoulder bags for both men and women. Featuring computer pockets, water bottle pockets, file compartments and organizer pockets.

The Alpha 25
From the Ultralight Collection

The Matterhorn
From the Mountain Collection

HOW THE WRAPSURE FIT SYSTEM WORKS
Webbing floats throughout the back panel and the WrapSure™ Hub. The webbing is anchored to the shoulder straps, enabling the pack to adjust and conform to the user's back. For improved fit around the hips, the webbing floats through the waist belt, channels through the buckle and is anchored at the leading edge of the belt.

EIGER 35
Sizes M, L
Materials 210d Nylon Double R/S • 210d Nylon Twill
Volume 35 liters
Weight 1332 g

The Eiger 35 is our classic, comfortable, all-around daypack - ideal for alpine-style climbs, long forays into the backcountry and spring ski trips.

Features: Compression Molded Back Panel with Air Comfort Technology • Front Stash Flap • Hip Hugger Waist Belt • Hydration Pocket and Port • Ice Axe Pocket • Removable Frame Sheet • S-Curved Shoulder Straps with Dri-Lex Mesh • Stretch Water Bottle Pockets • Tuck Away Ice Axe Bungees • Waist Belt Pocket • Waist Rack

WOMEN'S DIVA 35
Sizes S, M
Materials 100d Nylon Double R/S • 210d Nylon Double R/S
Volume 35 liters
Weight 1247 g

Extremely versatile backcountry pack for hiking, skiing and climbing; designed specifically for women.

Features: Compression Molded Back Panel with Air Comfort Technology • Front Stash Pocket • Hip Hugger Waist Belt • Hydration Pocket and Port • Ice Axe Pocket • Removable Women's Frame Sheet • Stretch Water Bottle Pockets • Tuck Away Ice Axe Bungees • Waist Belt Pocket • Waist Rack • Women's Specific S-Curved Shoulder Straps with Dri-Lex Mesh

MATTERHORN 30
Sizes M, L
Materials 210d Nylon Double R/S • 100d Nylon Shadow Box
Volume 30 liters
Weight 1276 g

Hit the trail expertly equipped, without sacrificing comfort. This thirty-liter pack is incredibly rugged and lightweight, yet it boasts a wealth of features that make overland travel in the wilderness easy and efficient. Strap and panel elements are engineered for comfort and stability, and professional appointments abound, like a hydration pocket and port, tuck away ice axe bungees, and a removable bivy pad.

Features: Compression Molded Back Panel with Air Comfort Technology • Haul Loop • Hip Hugger Waist Belt • Hydration Pocket and Port • Ice Axe Pocket • Removable Bivy Pad • Removable Frame Sheet • S-Curved Shoulder Straps with Dri-Lex Mesh • Shoulder Strap Clip Points • Tuck Away Ice Axe Bungees • Waist Belt Pocket • Waist Rack

Packs

TIROL 30
Sizes ONE
Materials 210d Nylon Double R/S » 210d Nylon Twill
Volume 30 liters
Weight 850 g

Pure simplicity meets 21st century know-how in the Tirol, a re-imagining of the classic rucksack design. Featuring a host of modern details, such as a hydration pocket and port, Hypalon clipping points, and stretch water bottle pockets, this surprisingly roomy pack comfortably hugs your body, thanks to Marmot's WrapSure™ Fit System.

Features: Compression Molded Back Panel with Air Comfort Technology » Hip Hugger Waist Belt » Hydration Pocket and Port » Hypalon Clipping Points » Ice Axe Bungees » Lid Pocket » Bright Coloured Rain Fly » S-Curved Shoulder Straps with Dri-Lex Mesh » Stretch Water Bottle Pockets » Waist Belt Pockets

ALPHA 25
Sizes ONE
Materials 210d Nylon Double R/S » 100d Nylon Shadow Box » 70d Nylon Double R/S
Volume 25 liters
Weight 936 g

Part of our Ultralight collection, this pack is streamlined for life on the move, and hosts a ton of useful features. Marmot's WrapSure™ Fit System with Dri-Lex mesh conforms neatly to your back for incredible all-day comfort. Numerous specialty pockets and clipping points complement an easy-to-use roll top closure. Includes a handy rain fly for wet weather treks.

Features: Front Stash Flap » Hydration Pocket and Port » Ice Axe Bungees » Rain Fly » Roll Top Closure » Stretch Water Bottle Pockets » Waist Belt Pockets » WrapSure™ Back Panel with Dri-Lex Mesh

KOMPRESSOR
Sizes ONE
Materials 70d Nylon Double R/S » 210d Nylon Double R/S
Volume 15 liters
Weight 283 g

The remarkable Kompressor has three points of load-shrinking compression, stows into its own lid, and turns into a day pack for summit blasts or side hikes.

Features: Airmesh Shoulderpads » Compression Straps » Hydration Sleeve » Pack Stuffs Into Lid » Removable Closed-cell Foam Back Sheet

URBAN HAULER MED
Sizes ONE
Materials 300d Upcycle® Poly
Volume 26 liters
Weight 340 g

The age-old Japanese fishing bag concept gets a 21st century makeover. Upcycled® fabrics are state-of-the-art and decidedly green. An internal organizer pocket makes keeping track of smaller items a breeze, and the shoulder strap converts to a handy carry handle.

Features: Front Pocket Accessory System » Internal Organizer Pocket » Lightweight Shoulder Strap » Shoulder Strap Can Be Converted to Carry Handle » Upcycle® Fabrics » Updated Style Lines

Sleeping Bags

Marmot's Heritage

Marmot began as a sleeping bag company and **we continue to pioneer performance, value and insulation standards** in the outdoor industry. Our sleeping bag collection includes our stellar 850, 800, and 600 fill power Down plus our synthetic **Pounder, Wave, and EcoPro series**. All our bags are **EN tested** and inspected to ensure **quality, performance and temperature accuracy**.

INDEPENDENTLY TESTED DOWN

As always, our Down is independently certified and undergoes a second test when it arrives at our facility. This assures the quality and fill power of each and every 800+ and 850+ fill power Down bag we fill in Santa Rosa (USA). Due to this rigorous testing we are confident that we are supplying the finest quality down available from anyone, anywhere.

EcoPro RECYCLED SLEEPING BAGS

Made from 80% recycled synthetic insulation and a 100% recycled polyester shell fabric, these environmentally friendly sleeping bags provide an Upcycled® alternative without sacrificing performance.

FACTS DON'T LIE!

All Marmot sleeping bags are EN tested at the Thelma Testing Center in Norway to assure accuracy and continuity in our sleeping bags' performance.

EN TESTED

850+ Fill Ultralight

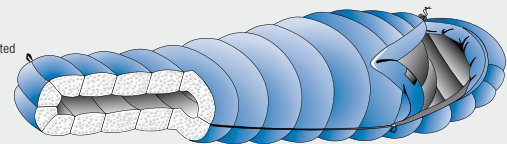

Photo: Klaus Forster

Stretch Tricot Baffles - allow the bag to be stuffed and unstuffed without creating a tear in the baffle material.

Trapezoid Foot box - foot box is constructed to match the shape of your feet, wider in the toe area and narrower in the heels.

Zipper guard - keeps the draft tube fabric from getting caught in the zipper.

Ground Level Seams - top layer wraps fully around the body creating a warm layer of down.

Passive Collar - helps prevent heat loss from around the neck and head.

Updated Full Length Zipper - easy in / easy out

Nautilus Hood - same construction as our 8000m jacket hood; a 3D hood that wraps around your head to help reduce heat loss.

Hood Muff - creates a warm down gasket around your face, keeping the drawcord away from the face.

Down Fill Oversized Draft Tube - to eliminate cold spots.

Wave Synthetic

Photo: Juralana

Wave Construction - offers the advantages of both traditional blanket and shingle construction with no significant increases in bag weight.

Trapezoid Foot box - foot box is constructed to match the shape of your feet, wider in the toe area and narrower in the heels.

Nautilus Hood - same construction as our 8000m jacket hood; a 3D hood that wraps around your head to help reduce heat loss.

Zipper guard - keeps the draft tube fabric from getting caught in the zipper

Marmot "Architecture"

Designs for the Future

More space, reduced weight and improved habitability – those are the ideas behind our new architecturally innovative tent designs.

We stay the course with our bomber Expedition and Ultralight series and have redesigned the Backcountry category with an update to the Aeolos 2P and the addition of two totally new styles, the Crib and the Abode, which boast increased comfort through a greater feature set, more internal room, ventilation, and reflective hits on the tent as well as the fly. Our hub system on the Abode and Crib creates more space without additional poles.

The Outdoor category welcomes a new member, the Den 4P, an appealing price point tent for the family set.

UPDATED CLIP
Marmot's new clip – easy one-handed on and off

HIP JOINT
New Hip Joint attachment point – designed for greater strength and ease of use

STA-PUT SYSTEM
An innovative new way to lock-in the pole tip
